DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a carbon monoxide transforming apparatus, classified in class 454, subclass 239.
- II. Claims 12-14, drawn to a fuel cell power generating system, classified in class 429, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the fuel cell may employ an other precious metal catalyst driven carbon monoxide transforming apparatus to generate power. The subcombination has separate utility such as air exchange systems for buildings.

A telephone call was made to Greg Maier on March 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Conclusions

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Monique Wills whose telephone number is (703) 305-0073. The Examiner can normally be reached on Monday-Friday from 8:30am to 5:00 pm.
